Art Unit: 3632

This is the second office action for application number 09/776,355, Arm

Apparatus for Mounting Electronic Devices with Cable Management System, filed on February 2, 2001.

Election/Restrictions

Applicant's election without traverse of invention I, claims 1-32, 34 and 35, in Paper No. 9 is acknowledged.

Information Disclosure Statement

The information disclosure statement filed February 2, 2001 (beginning with U.S. Patent No. 3,131,900) fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file and the information referred to therein has been considered.

Drawings

The drawings are objected to because reference number "154" in Fig. 10B appears to be referring to the wrong element, the specification on page 11, line 15 indicates reference character "154" as tapping screw holes; reference character "126," retainer clip, is not in Fig. 10B as suggested by the specification on page 11, line 17; reference character "132" in Fig. 11A (right side) appears to be referring to the wrong

Application/Control Number: 09/776,355

Art Unit: 3632

element; reference character "224" is not referring to a wall in Fig. 25 as it is in Fig. 16A; reference character "84" in Fig. 11A appears to be incorrect and should be --184---; reference character "12C" (without lead line) in Fig. 12B should be deleted; reference character "278" is not in Fig. 9 as suggested in the specification on page 18, line 32; reference characters "274," "276," and "210" are not in Fig. 9 as suggested by the specification on page 18, line 33; reference character "197" is not in Fig. 9 as suggested in the specification on page 18, line 38; reference character "226" in Fig. 24 appears to be incorrect and should be --217---; reference character "470" in Fig. 37 appears to be incorrect and should be --476---; reference character "482" in not in Figs. 34 or 44 as suggested in the specification on page 25, line 26; and reference character "520" is not in Fig. 34 as suggested by the specification on page 26, line 13. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "228," centerline and "526". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: "472," in Fig. 44. A proposed drawing correction, corrected drawings, or amendment to

Application/Control Number: 09/776,355

Art Unit: 3632

the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the channel in communication with the first and second openings of the forearm extension must be clearly shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: the recitation of "410" on page 20, line 34 appears to be incorrect and should be --110--; reference characters "410" and "110" are referring to the same element page 20, line 8 and line 34; the recitation of "562" on page 26, line 17 appears to be incorrect and should be --462--; the recitation of "474" on page 26, lines 20, 23, and 25 appears to be incorrect and should be --470-- and the recitation of "470" on page 27, line 17 appears to be incorrect and should be --506--.

Appropriate correction is required.

Art Unit: 3632

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 13, 16-20, 24, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,123,621 to Gates. Gates discloses an adjustable extension arm for mounting a device thereto, the extension arm comprising a forearm extension (4) having a first end and a second end for attachment of the device thereto, the forearm extension having a first opening at the first end and a second opening adjacent the second end, the first and second openings in communication with each other through a channel provided within the forearm extension between the first and second ends; a first endcap (3) having a first end rotationally attached to the first end of the forearm extension, the first endcap having an opening extending therethrough in communication with the first opening within the forearm extension; a second endcap (1) having a first end attachable to a support structure (45); elongated first (20) and second (21) channel members nested together to form a channel therebetween, the first and second channel members having first ends pivotably attached to the first endcap and the second ends pivotably attached to the second endcap; wherein one of the channel members has an elongated opening between the first and second ends providing communication between the exterior of the channel member and the channel formed therein; wherein the channel formed between the first and second channel members is

Application/Control Number: 09/776,355 Page 6

Art Unit: 3632

in communication with the opening extending through the first endcap; a gas cylinder (26) within the channel formed between the first and second channel members, the gas cylinder retaining the first and second endcaps and the first and second channels in a parallelogram shape; wherein the first and the second endcaps have vertical axes, the axes maintained in parallel alignment while the first and second channel members are pivoted at their respective first and second ends about the first and second endcaps; a mounting assembly (5) attached to the second end of the forearm extension, the mounting assembly having a support plate (51) for attachment to an electronic device; a cable pathway through the opening extending through the first endcap and the internal elongated channel; and a cover (36, 37) removably attachable to the forearm extension overlying the internal elongated channel.

Allowable Subject Matter

Claims 6-12, 14, 15, 21-23, and 26-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 29-32, 34, and 35 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent 4,844,387 to Sorgi et al.

Application/Control Number: 09/776,355

Art Unit: 3632

U.S. Patent 5,348,260 to Acevedo

U.S. Patent 5,82,846 to Buccieri et al.

U.S. Patent 6,095,468 to Chirico et al.

The above patents all disclose various types of adjustable supporting arm assemblies.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anita M. King whose telephone number is (703) 308-2162. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leslie A. Braun can be reached on (703) 308-2156. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-3597 for regular communications and (703) 308-3519 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-2168.
